

1. Introduction

The Intelligent Enterprise Assistant is an AI-driven chatbot designed to assist employees of a public-sector organization in accessing HR policies, IT support information, and internal updates efficiently.

2. Problem Statement

Employees face delays in retrieving internal information. Manual processes reduce productivity.

3. Objectives

- Provide instant responses to HR and IT queries
- Process uploaded documents (summarization & keyword extraction)
- Ensure response time < 5 seconds
- Enable email-based 2FA authentication
- Handle minimum 5 parallel users

4. Stakeholders

- Employees
- HR Department
- IT Support Team
- System Administrator

5. Scope

In Scope:

- Chatbot query handling
- Document processing
- Authentication system
- Logging & monitoring
